- Includes wide table and other quilting accessories

Enjoy the highest standards of performance with the Innov-ís 600

Be sure of the best stitch every time

With over 400 built-in stitch combinations, including a range of utility stitches from blind hems to advanced decorative patterns, the **Innov-ís 600** will revolutionise the way you sew – powerful features include Brother's fully automatic thread tension system and sideways feeding.

Choose from 429 utility and decorative stitches including 10 automatic buttonhole styles and 3 lettering styles.

Easy to use functions

Just choose the function you want from the control panel, press the button and you're ready to sew.

Direct stitch selection

Making your stitch selections could not be easier. Simply key in the number of the pre-programmed stitch you would like to use.

My favourite stitch

A handy function that allows you to store your favourite stitches, giving you one touch access to those most frequently used.

My Custom Stitch™

This unique feature allows you to design your own decorative stitches on the LCD display panel and save them to memory, to use whenever you wish. Extremely handy for quilting and similar design projects.

Customised settings

Allows you to adjust the stitch width, length and thread tension to your personal preference. Customised settings can be saved to memory to use again in future.

Programmed thread trimming

The automatic thread trimming cuts both upper and lower threads at the end of each sewing task.

Error messages

The machine prompts you to oversights. For example, if the buttonhole lever has not been lowered, a sound and display message will notify you.

Automatic thread tension

Whatever fabric you use – light, heavy or stretchable the **Innov-is 600** automatically senses the thickness of your fabric and immediately adjusts to the most appropriate thread tension to suit your stitch.

Sideways feeding

Ideal for attaching appliques to fabric that cannot be moved around, such as cylindrical pieces. Allows you to sew straight stitches and zigzag stitches to the left or the right.

Wide table

Presser-foot pressure adjustment

Helps you stitch pucker-free seams on even the stretchiest of knits. Simply adjust the pressure applied by the presser foot.

F.A.S.T. bobbin winding system

Just wind the thread around the bobbin, pass it through the guide slot and press start. It's bobbin winding made easy.

Speed control customised for zigzag width

The slide control can be set from slow to fast to ensure you always sew with safety and accuracy, particularly on intricate detail or curves. This control can also be programmed to alter the stitch width.

Advanced needle threading system

With the **Innov-is 600's** advanced built-in system, threading the needle is effortless.

Presser-foot levelling button

Keeps the presser foot level for smooth, consistent stitching over changing fabric thickness, such as the start of a seam or crossing seams.

Seven-point feed

With extra teeth for smoother feeding, the feed system creates superior stitch quality and smooth, pinpoint seams on any weight of fabric, from sheer silk to corduroy and denim.

The large sewing area of the **Innov-Is 600** helps make light work of large items and with the included wide table it's easier than ever to handle large projects such as quilts and bed linen.

Stitch reference panel

The **Innov-Is 600** is supplied with a detachable quick reference panel. So you can easily find the number of the stitch you want to use.

Quilting extras

Sewing or quilting work is more versatile and neat with accessories that include a Quilting Foot, 1/4" Quilting Foot, Walking Foot, Quilting Guide and Side Cutter.

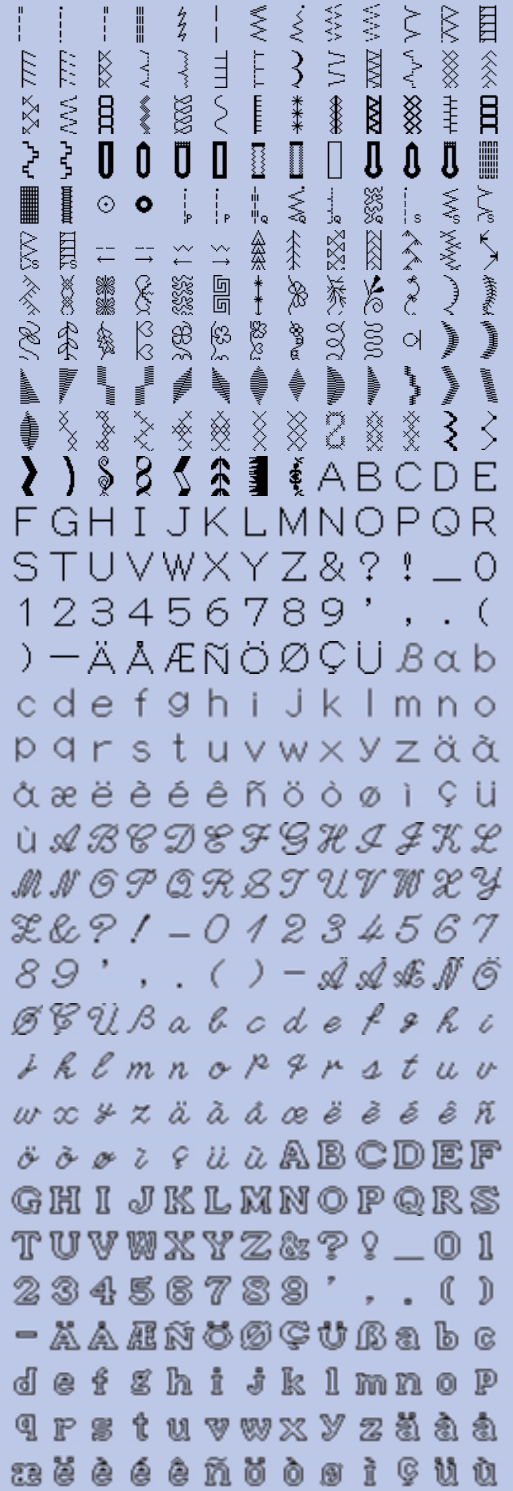

Knee lift

Free up your hands by using your knee to lift the presser foot. Ideal for working on large projects such as quilts.

429 stitches

The built-in stitch selection is perfect for enhancing the sewing of your projects, from clothing to home décor.

Innov-is 600
