Colour Shuffle

If there are less than 10 spools on the thread stand then the shuffle will be made based upon the number of spools being used

Colour Shuffling

If there are not enough colours on the thread table based upon the shuffle selection made.

The screen will advise by graying out those selections which cannot be made.

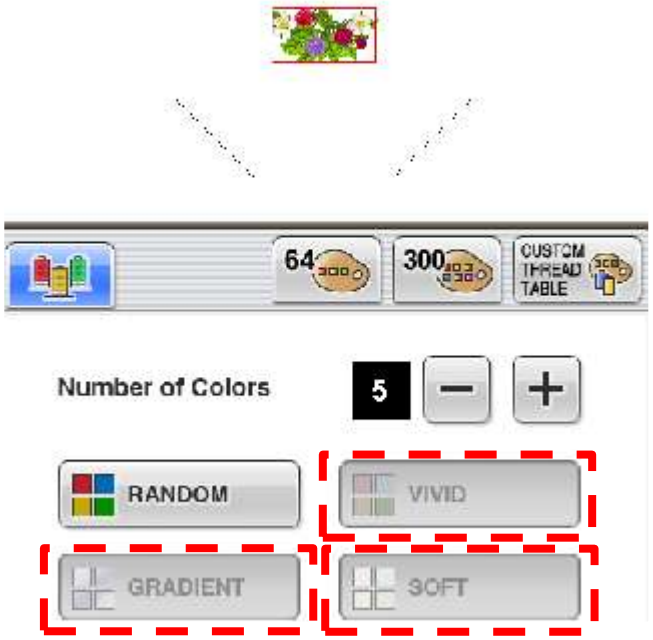

Image Scanning Function

Image scanning function ac only be used with flat embroidery frames and does not function with the cap frame and cylinder frame.
