HORIZON

Memory Craft 7700 QCP

A new generation of long-arm models starts with the stunning HORIZON. We've taken all the best and easiest to use features from all our other models and packed them into one unbelievable sewing machine.

The sheer length of the arm space is impressive at 280mm (11")... ideal for large quilts, bridal dresses and those bigger home furnishing projects. And it's powerful... reaching speeds of up to 1,000 stitches per minute. Nevertheless even at those speeds stitch quality is a priority. With a built in AcuFeed system for precise fabric handling and an automatic needle plate converter to enhance straight stitch performance... rest assured this machine offers spectacular stitch quality.

Shadow free lighting is provided by 5 bright white lights whilst quick and easy stitch selection can be made on the large touch screen or with the jog dial. Choose from over 600 stitches, alphabets and numbers including some great fun play stitches. Memorise a combination of these... the HORIZON will calculate the length of the combined patterns just to make sure they fit into the available space. Other special features include an automatic needle threader, a speed

controller to set the maximum sewing speed and a stop/start button if you choose not to use the foot control. It also has a needle up/down button which programmes the needle to either finish in the up position or in the fabric... great for pivoting on corners! It has a lock stitch button to ensure every stitch pattern is locked off at the end and even an automatic thread cutter to trim your threads.

It doesn't matter whether you are dressmaking, quilting or making home furnishings, with creativity this easy you'll just want to get started.
